The background is a dark blue field filled with numerous diagonal stripes in various shades of blue, cyan, purple, and orange. These stripes vary in width and opacity, creating a sense of depth and movement. Overlaid on this is a faint, glowing network diagram consisting of small blue dots connected by thin, light blue lines, suggesting a global or digital connectivity theme.

# INTRODUCTION

# INTRODUCTION

There is an estimated number of two billion people remain unbanked globally with no access to any kind of basic financial service. Recent technological developments at financial service basis, technology leads people to involve into it. Speaking of financial development, blockchain technology is a non-negligible one. Thus, blockchain leads the market with Bitcoin. Bitcoin is the pioneer blockchain based cryptocurrency in the market. It is considered a revolutionary invention, however, it has deficiencies that affect the easy and efficient use of it in our daily lives. This has to be overcome. Providing a service with the ease of use for everyone with sustaining the advantage of blockchain and cryptocurrency technologies together is the key for achieving the ultimate payment system. There are many emerging developments and Vipe aims to gather all of them together.

The background features a vibrant, abstract design with diagonal stripes in shades of blue, purple, and orange. Overlaid on this is a network diagram consisting of circular nodes connected by thin lines. Each node contains a small, semi-transparent image of a person, likely a professional, engaged in communication. A large, white-outlined circle is centered on the page, containing the text "VIPE".

VIPE

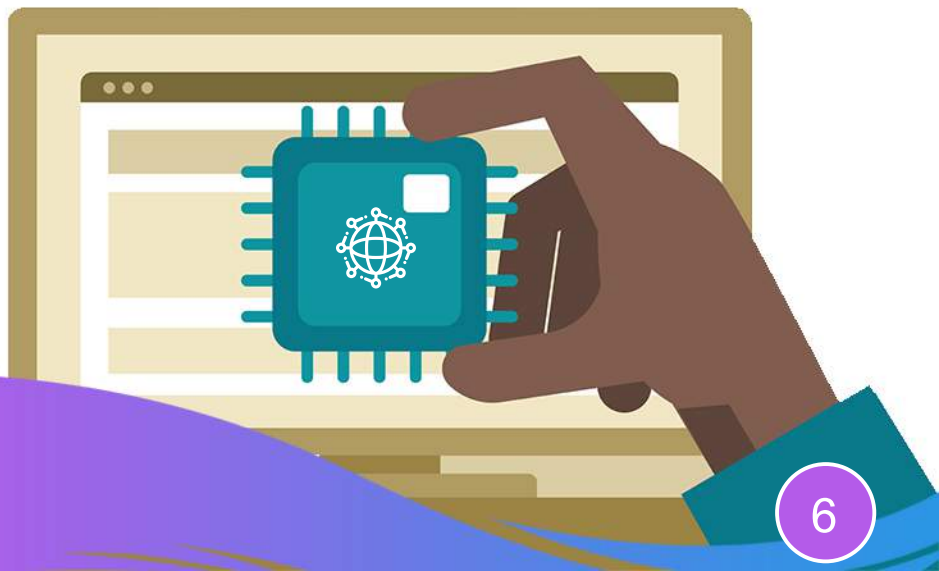

## WHAT IS VIPE?

Vipe is an innovative payment system that enables its users to have the most easy to use and reasonably-priced services for cryptocurrencies. Users are enabled to easily store and exchange between cryptocurrencies and fiat currency with the most satisfactory rates for the user. And the much more preferable part of the system is that Vipe don't charge users for sending and receiving crypto assets. That means free transactions for all users, including Vipe (VPE), Bitcoin (BTC) and Ether (ETH) cryptocurrencies.

Exchanging between assets including VPE, BTC, ETH and USD are instant with almost non-existing fees.

Users are also enabled to use VipeCard; the solution for spending crypto assets and cash withdrawal from ATM's all over the world.

Combining all of these features, Vipe gather all of the crucial requirements to have a complete cryptocurrency solution.

## THE PROBLEM AND VIPE SOLUTION

In recent years, cryptocurrency usage enables us to buy a house, or even a supercar. But when it comes to transfer assets to someone or spending a small amount may cause high fees and it may exceed the actual product/service we are taking. This means, the liquidity of cryptocurrencies is low. Liquidity is the measurement of how easily and quickly an asset is transferred, bought or sold without affecting the market price. In this manner, cash is the most known and liquid asset. Vipe's solution is to gather the liquidity of cash and the secure and private environment of cryptocurrencies together. By doing this, efficiency in transfer expenses, time saving and easy usage features are obtained.

## TECHNICAL INFORMATION

Vipe Technologies uses its own enterprise blockchain system. Every detail about transactions and all user operations are stored on a centralized platform. This platform also provides a backup feature that secures our users to have involuntary asset losses. In other words, all users are protected against any kind of vicious process. As the worth of VPE increases and the earnings of Vipe Technologies grow, our server headquarters will scatter through different locations on distinctive regions. This strategy provides top level security and spare logic. for Vipe system.

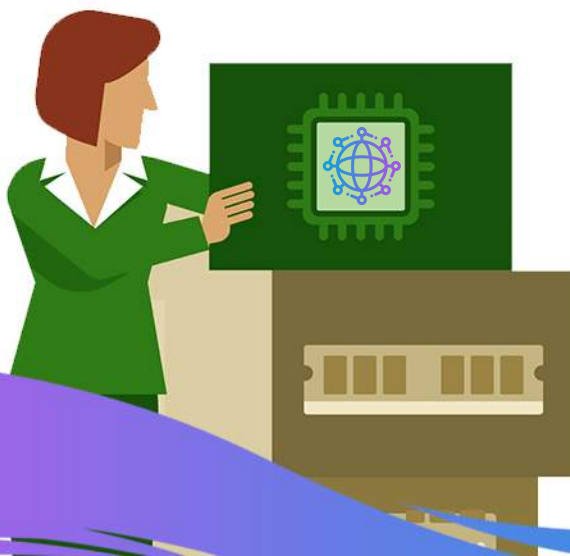

## VPE TOKEN

Vipe aims to put forward a constantly-evolving token that will always counterbalance the demand of the users and provide all features of the blockchain. The abbreviation "VPE", is the label for the Vipe cryptocurrency. A total number of 100.000.000 VPE Tokens are produced. One VPE can be divided in to 1.000.000 units. The smallest unit of VPE is called "Vip". In this manner, 1 Vipe equals to 1.000.000 Vip and 1 Vip equals to 0.000001 Vipe.

Our prominent software development team created a cryptography method called "I2 algorithm", containing a complex and unique function that is used on each Vip. As a result, 100 trillion Vip's are generated.

# TOKEN DISTRIBUTION

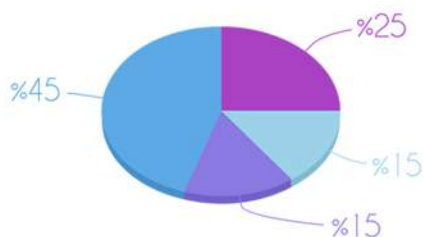

The distribution of limited 100,000,000 VPE tokens is shown below.

## VPE Token Distribution

Total Vipe token count is 100,000,000

Distribution of the tokens is as follows;

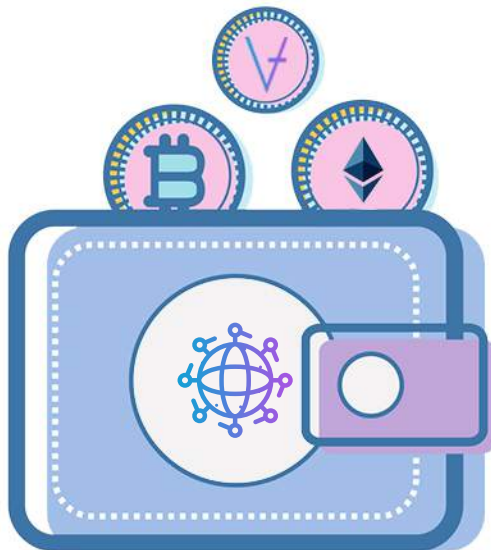

- Pre-Investors and Vipe Team
- Free Reserve, Backup, Airdrop Program
- Pre-ICO Token Sale
- ICO Token Sale

## VIPE WALLET AND VIPER PANEL

Users are able to reach their account using Vipe Wallet mobile application that is available on IOS and Android platforms. Vipe Wallet includes features of; store, send, receive and exchange between assets. Also account information and user profile are available on Vipe Wallet.

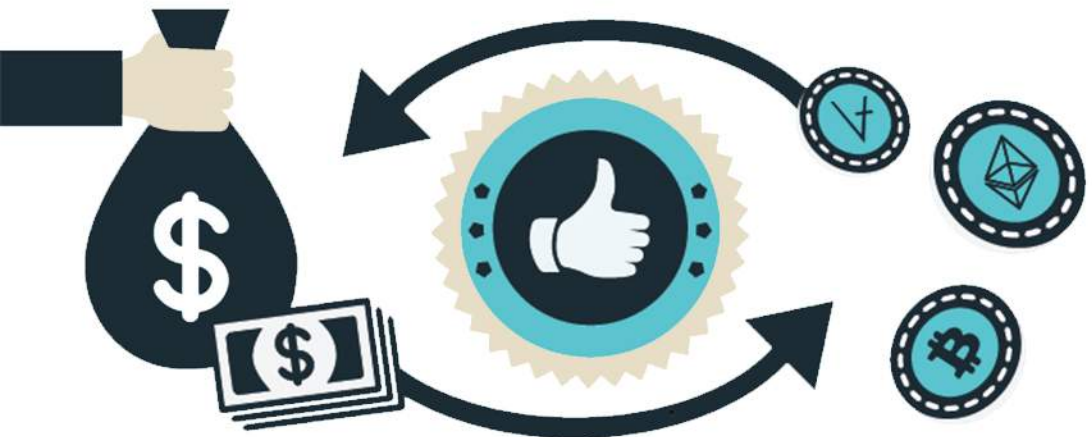

It is also possible for users to reach out Viper Panel from any web browser, being able to perform all features of the system with no need for a smartphone.

## VIPE EXCHANGE

Vipe has its own exchange named after the system itself. Besides the fact that VPE will be listed on notable cryptocurrency exchanges, users will be able to exchange between VPE, BTC and ETH instantaneously through the Vipe Wallet mobile application or Viper Panel.

While exchanging between these assets, users pay almost non-existing fees using VPE as the fee. This procedure leads VPE to gain value day by day. The discount rate while paying the exchange fee with VPE is %50 and it is discounted instantly during the exchange process.

## NO FEE PROCEDURE

Vipe offers its users to store, send and receive VPE for free forever. There aren't any amount or another limit. In addition to this, Vipe also offers to send BTC and ETH for free. There will be still imperative transaction fees that miners take for BTC and ETH transactions, but Vipe won't charge users for that. Instead, these fee expenses will be covered by Vipe Technologies' income. Since Vipe Technologies will derive profit from capital gain after ICO completion and exchange entrances, Vipe Technologies divide this value to offer users no transaction fee procedure. In this manner, a user who received VPE to his/her wallet at least once, will be able to start sending BTC and ETH for free.

Vipe system automatically detects the activeness of the user. Thus, the activeness of the user designates the no fee for BTC and ETH transaction right of the user. There is a minimum of two transactions of BTC or ETH per day is guaranteed to all users. Afterwards, by use of VPE as the fee amount, BTC and ETH transaction expenses are decreased by %50.

## VIPECARD

VipeCard is the ultimate solution for users to be able to pay and withdraw in fiat currency, corresponding to crypto assets on the users balance. Spend your crypto assets at thousands of point of sales' and withdraw cash from ATM's all over the world.

When the user manages to use VipeCard to pay or withdraw for any good/service, during the process, if the user has equivalent crypto assets, the amount will be paid/withdrew automatically. If the user has already activated "Reduce costs, use VPE" feature, crypto-fiat exchange fees are taken at %50 discounted price.

The VipeCard deposit amount is 10\$ (excluding shipping costs). This amount could be paid in VPE, BTC or ETH. It is a one-time charged fee and VipeCard service is optional.

The image features a dark, textured background with a pattern of colorful, diagonal, brush-stroke-like stripes in shades of blue, purple, orange, and red. A white circle is centered in the image, containing the text "ICO" in a white, sans-serif font.

ICO

## DEFINITION OF ICO

ICO is the abbreviation of Initial Coin Offering. Necessary funds to start a project are raised for a new cryptocurrency venture through ICO. Participants of an ICO have the advantages of both using the projects features and an advantageous condition in the near future when the project succeeds.

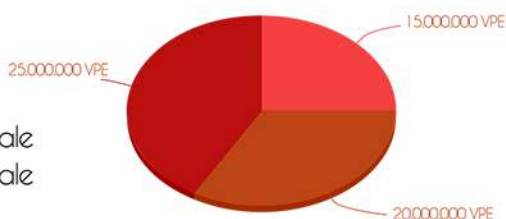

# ICO STAGES

Vipe has 3 ICO stages to distribute a certain amount of VPE tokens. These stages are Pre-ICO, ICO Stage 1 and ICO Stage 2 respectively. All three stages has advantage on the token sale price, as early so cheaper. The price of 1 VPE token starts from 0.5\$ after all stages have completed. In addition, the discount on the token sale prices are %50, %40 and %20 respectively. Distribution of ICO token sales is shown below on the chart.

## ICO Stages

The chart shows the distribution of three stages of Initial Coin Offering token sales.

- Pre-ICO 15.000.000 VPE token sale
- ICO Stage 1 20.000.000 VPE token sale
- ICO Stage 2 25.000.000 VPE token sale

Pre-ICO Token Sale Date Range:  
ICO Stage 1 Token Sale Date Range:  
ICO Stage 2 Token Sale Date Range:

25 March - 04 April 2018  
06 April - 16 April 2018  
18 April - 28 April 2018
