# What is cryptocurrency

## Introduction

---

A cryptocurrency (or crypto currency) is a digital asset designed to work as a medium of exchange using cryptography to secure the transactions, to control the creation of additional units, and to verify the transfer of assets. Cryptocurrencies are classified as a subset of digital currencies and are also classified as a subset of alternative currencies and virtual currencies.

Most cryptocurrencies are designed to gradually decrease production of currency, placing an ultimate cap on the total amount of currency that will ever be in circulation, mimicking precious metals. Cryptocurrency, specifically Blockchain, has been proven to be a groundbreaking technology in society today, yet it is still in the early stages of adoption. Consequently, many new cryptocurrency concepts are being marketed to bridge the gap between technical complexity and usability of Blockchain.

**We are Sphinx with a successful Exchange and Lending platform at [www.sphinxcoin.co](http://www.sphinxcoin.co) and we are presenting an opportunity for investors to participate in our new exchange and lending platform**

Sphinx Coin is a Latest cryptocurrency emerging in the new era of digital financial world. It is introduced in the innovative hybrid platform which allows investors to invest and increase their wealth sustainably. The concept of Sphinx Coin is similar to bitcoin, except the fact that there are still plenty of opportunities for the investors to acquire Sphinx Coin as it's ICO price is still affordable and will be profitable remarkably

## VISION

To be worthy of a secure money power for sustainable future

## MISSION

Make your money grow faster with our ingenious investment programs.

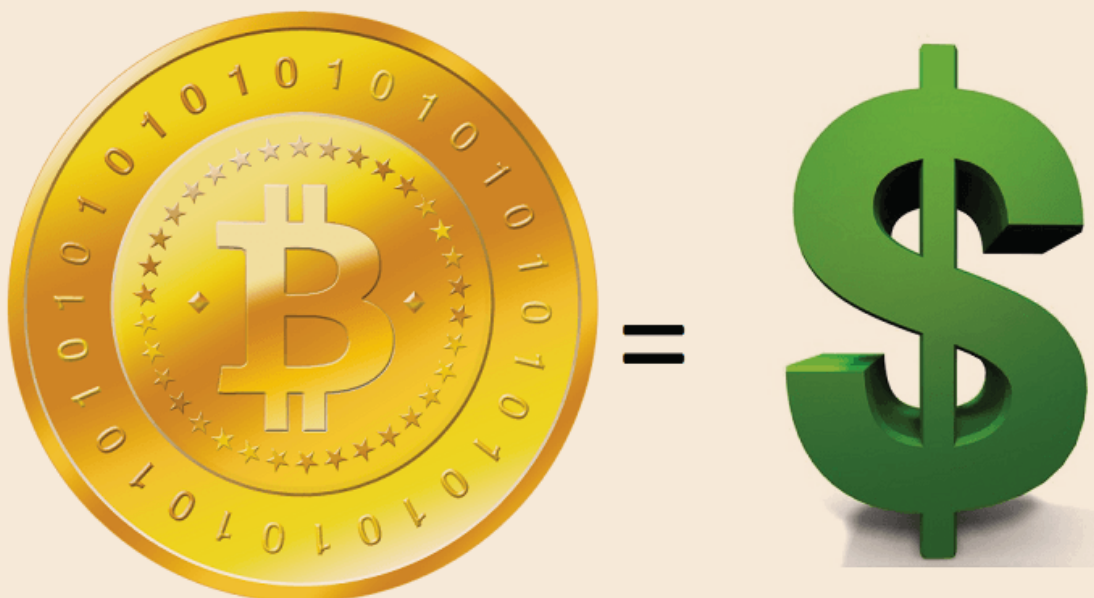

Sphinx Coin is cryptocurrency, an encrypted decentralized digital currency transferred between peers and confirmed in a public ledger. Operating under the blockchain database, Sphinx Coin employs the highly secure peer-to-peer network. This means that the data are connected and shared without going through a separate server computer. All transactions are kept safely through the blockchain protocol.

However, Sphinx Coin's holder can make transactions anonymously, except that the holder himself allow others to know his name.

Sphinx Coin can be transferred online conveniently. Having the Internet connection, the owners of sphinx Coin can make transactions globally anytime they want. To start the processes, investors have to sign up their account via the sphinx Coin website. Then, they will get an online wallet, which can be used to keep and transfer their wealth worldwide.

**The total supply is 19,000,000 SPNX**

**The transfer fee for sphinx Coin is set to be 0.0005 only.**

## **Sphinx Coin Consideration**

Though our intension is to promote the chance of getting the highest return to all investors. It must also be admitted that when you invest, you're exposed to different types of risk. These risks involve the chance an investment's actual return will differ from the expected return. The greater the amount of risk an investor is willing to take, the greater the potential return. Investors need to be compensated for taking on additional risk.
