ROADMAP

INTRODUCTION

Midnight Greenwich Trading interrupts in the trading sector with a new business model.

Supported by block chain technology, trading community takes over the role with the advantage of crypto daily trading.

It is a platform which is connected directly to the great community of exchange so it all can work united mart contracts,

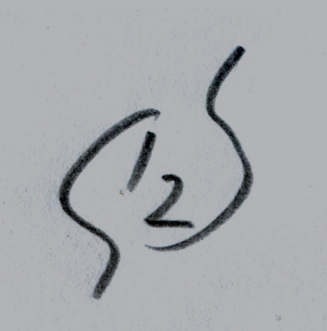

which is a new, exciting and positive approach to peer-to-peer trading.

The vision of *Midnight Greenwich Trading* is to support a global self-sufficient community based trading within the community, **all united and coordinated** in the chain, buy and sell no matter where you are on the planet and at the same agreed time.

We named the token "12" for *Midnight Greenwich Trading*. One for odd days, two for even days around the year. **Odd days only for buying, and even days only for selling.**

When? Exactly at midnight greenwich time (23:59:59' GTM) in any country of the world.

The team (12) resides in Ibiza, Balearic Islands, Spain.

OPPORTUNITY

We are aware of the opportunities and have the knowledge and ideas for services with a new perspective which can be implemented with the block-chain technology.

With the economic growth, development also increases, because of the imminent need for greater balance and safe trading, the creation of *Midnight Greenwich Trading* is essential.

The core of *Midnight Greenwich Trading* is to replace the existing

intermediary role by blockchain technology to connect to the community through the pool.

You will never feel the panic to sell again! Because you and all the community in the trading sites, will know the exact moment when the graphics will drop or pop up.

Think of all the opportunities which this perfectly organized trading tool can make with your tokens. Following the flow of the trading all together. Reach the size of your coins every day.

The graphics constantly moving up and down in a perfect manner like you have never seen before. Totally independent from other coin price drops and breaking news. *Midnight Greenwich Trading* will provide you a safe gain at the first second at the trading sites. And the trading sites will have their gain too. It's a win-win situation.

What we offer in fact is so simple, so obvious, that nobody thought about it before.

HOW DOES IT WORK

We start right now by developing new services and information for this token in the official website of (12) which will optimize trading at any moment of the year.

First, we will establish the *Midnight Greenwich Trading* pool. The idea is to unite the great community of an exchange to make a sustainable safe agreed trading and especially, free of any speculation.

You can join the pool. But to be able to trade you are going to need Midnight Greenwich Trading tokens (12). Which will be issued on this website on token sales.

Here is a simplified example of how Midnight Greenwich Trading works:

CONSUMER

First of all, registration through the web is necessary. Registration will be quick and simple and will allow an immediate smart contract signature. This is all that the consumer needs to start shopping with *Midnight Greenwich Trading* (12).

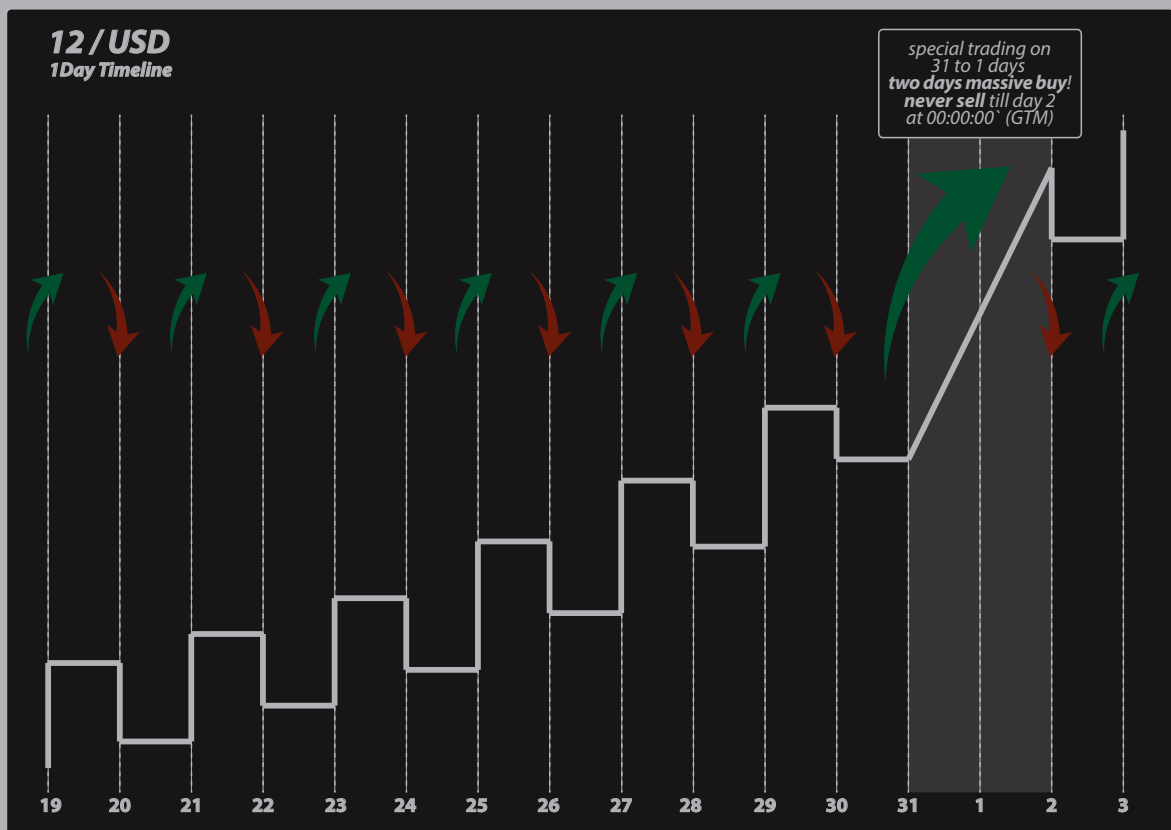

If person A already has (12) tokens, after the participation in the ICO, can simply use them in the near future on trading sites.

Other users will have to buy (12) tokens in the exchanges available in the future. Automatically Due to the huge potential of global demand and competitiveness, the coins will grow constantly and also their value.

TO PRODUCE

Person B is currently selling his tokens to other users of the exchange community, where your position to trade is weaker.

By joining (12), you could get better compensation for your tokens compared to beginning. The more you have, the more control you get on the trading graphic flow.

MIDNIGHT GREENWICH TRADING TOKENS(12)

When you participate in the sales of tokens, you will receive tokens of 12. As the only crypto currency that we accept in the token sales is Ethereum, we decided to 12 millions (12.000.000) the amount of (12) to the Ethereum we collect. The prices and offers are in the official webpage of *Midnight Greenwich Trading*. 12coin.biz

The amount of chips you get, depends on your participation date and the mount you buy.

HOW TOKEN SALE FUNDS WILL BE USED

The funds will be truly used for development, marketing and sales, operations and legal.

There is no extra promised imaginary entity to invest, all for the community, and marketing to make that community bigger.

ICO Funds Distribution:

- 50% development
- 30% marketing and sales
- 15% operations
- 5% legal

100

GENEROSITY

The proportion of chips for each participant in the reward will be as large as the contribution. The bigger effort put into the promotion of *Midnight Greenwich Trading*, the higher the contribution, thus the greater the reward. We all know those fake draws on social media, we don't promise that.

CONCLUSION

Midnight Greenwich Trading (12) is the community united under simple and massive trading indicators, it is the smart way to gain money safely, and most importantly, **this is the trading-blockchain revolution.**

F.A.Q.

What is 12?

12 is the trader name for "Midnight Greenwich Trading". It is an unique name for a new concept for those that trade daily.

Why 12?

1 for buying on odd days of the calendar, 2 for selling on even days of the calendar. It couldn't be more simple.

What is Midnight Greenwich Trading (12) use for?

Organized based community trading is the soul of the coin, we don't promise impossible shiny great things for the future, we promise things from the first second of the coin in the trading sites. With the help of you and all the trading community.

How it works?

We give the community the exact hour/minute/and second for buying and selling the coin in every moment of the year. So you can trade every 24 hours. Forget the panic sell and never mind the hype, you will never hear about the future of this coin in any news site. The price of BTC and ETH doesn't matter, this is a secure trustworthy trading for all people.

How 12 trading works?

Use any available 12 trading site. Buy only on odd days, and sell only on even days at 23:59:59` GTM any day of the year.

For example?

Imagine, today is June 11, you are in Ibiza, Spain. Now u have to be sure the GTM time. Ibiza is in Spain and is +2GTM, (+1GTM on summer). The day is 11 (odd), odd days is a day for buying at 23:59:59` GTM. In this circum-

stance, your buy time is 01:00AM every even day, and sell every odd day at 01:00AM. (02:00AM on winter)

What if i sell my 12 tokens a few minutes or seconds before 23:59:59` GTM?

You may think u are smart and take profits of the coin. But after only a few times the coin will lose credibility. In a near future this will make the coin untrusted. In order to keep the advantages of the coin for everyone, the whole community must respect the rules. Of course traders may take advantage and profit for short term but if you play smart this coin is for the community in mind. In doing so it will serve you as you serve it.

Do I have to be alert all days of my life at 23:59:59` GTM to buy and sell the even and odd days?

No, but if u want to stop for a few days, we recommend to HOLD, because the price is estimated to grow with the community.

I want to start trading now, i cant wait for 00:00GTM, what should i do?

After ICO releases and becomes available in trading sites, we recommend buying coins on an odd day only. Patience, or you could take less profit.

What about the days 31 to 1?

Is like Christmas day for 12 coin, Just buy more and more at any time during those 48 hours and make the graphics increase exponentially. Buy with no panic or sell stress. The graph will go up and

the whole community will know when to buy at the exact moment for the graph to fall in order to benefit from profits. Make sure to trade on these odd days, it's our best bet for special trading and profit for all.

What do you recommend for perfect trading?

The graphics will have a massive grow and fall at 23:59:59` GTM, make sure to stay alert a few minutes in your favorite trading site available, and make a buy/sell order (depend of the day), a few satoshis more or less (depend if you buy or sell). You could fail the order because wasn't enough satoshis price in your order, in that situation we recommend holding for the next 48 hours or you will lose profit. If all of the community respect the rules, all of the community will follow the flow of the coin.

Why i should buy the ICO?

The 12 concept promises real facts. Community takes control of the trading, the more coins you have from the beginning, the more control you will have of the trading soul of the coin.

You will take profit the first odd day of the trading sites releases. This is not a normal ICO, we are bored of the ICO history massive sell in the first day and then the slow grow graphics.

12 is not an ICO you buy and sell at first moment and then you see if it works, because the rules are understood from beginning and the whole community will make profit from the first moment of trading.

ROADMAP

2017 Q2	- Team building and prototype development
pre ICO	<ul style="list-style-type: none"> - Development of an end-to-end business process - White Paper - Establishing agreements with potential freighters - Copyright idea registration - Graphic corporative design study
