Introduction

Crypto currency has already changed the world over the past few years, but here at TurboTradeCoin, we want to take this progress even further by combining our advanced decision making algorithm with highly profitable traders in the Industry. While it's true that many crypto currencies incorporate blockchain technology, several of them don't use it to the best of its abilities.

However, it is the TurboTradeCoin vision that investors have total control over their finances as well as utilizing the latest advances in programming and processing power to achieve this goal. This is able to occur because our team of software developers along with our professional economists and traders have developed and tested a decision making algorithm which has proven the ability to handle huge amounts of data in a small timeframe using the blockchain to manage all the aspects needed to execute profitable trades as different parts of the ecosystem interact with one another in a decentralized arrangement.

The TurboTradeCoin platform functions seamlessly without the need for banks or financial institutions involving themselves in the key decision making processes which then allows all TurboTradeCoin users achieve financial freedom. This also provides a much safer way of investing, due to the decentralized system, identity theft and other fiat currency problems aren't an issue. TurboTradeCoin holders will be able to make investments using a real world tested platform that delivers, thereby increasing the value of the coins that they hold.

These investment opportunities include trading on the Mirror trading platform, Mining, Exchange Trading and Staking. The value of all crypto currencies is generally something that is determined by numerous factors. This includes supply and demand, function and of course, factors of the economy. Because of this, TurboTradeCoin and the blockchain market have extensive room to grow in a significant way. The sooner you invest, the lower the price of the coin, and then you're simply in a better position for the long run. To put it simply, TurboTradeCoin is a self-regulated financial trading system, which is able to provide multiple investment opportunities and financial independence to investors. This all takes place within the TurboTrade community, containing peers who are like-minded and able to push the TurboTrade brand to become the number one crypto currency trading platform around the world in the upcoming years.

What is TurboTradeCoin?

TurboTradeCoin is the next generation cryptocurrency built around its own platform which has the capacity for mirror trading using artificial intelligence driven algorithms to execute profitable trades on a consistent basis. As a crypto currency, TurboTradeCoin is a digital coin that is available on a global scale. The initial price for this coin will be \$0.50 and there is a quantity commitment of 55,000,000 TTC tokens in total. These crypto coins incorporate high confirmation speeds and they have an immunity level of 99.99% against fraudulent activities. Working with blockchain technology, this makes the coins both transparent and low-cost. The TTC coin will be available via multiple different crypto currency exchange platforms, including Cryptoria, Bithumb and Kucoin at the initial phase.

At these platforms, users will be able to exchange and trade the coins in a peer-to-peer environment. The TurboTradeCoin can also be bought and sold with both fiat currencies and alternative crypto currencies. As an addition to this, the price of the coin will be determined by the different market forces and crypto currency exchange systems. The price of the coin does not have a maximum level, meaning that it has the ability to increase to remarkable values providing users within the ecosystem work together to realize the TurboTradeCoin vision.

Our decision making algorithm is currently in use in the following exchanges, and our development team are always working on fixing bugs and updating the algorithm to ensure optimum performance at all times.

Specifications Page

Name	TurboTradeCoin
Symbol	TTC
Type	PoW/PoS Hybrid Blockchain
PoW Algorithm	X11/Scrypt
Block time	90 seconds
PoS Rewards	10% Monthly First Year
PoS Minimum Staking Time	24 hours
PoS Maximum Staking Time	Unlimited
Coin base Maturity	25 blocks
Max Supply	55,000,000
Coins Pre-mined	5,000,000

ICO Pricing

The ICO for TurboTradeCoin will offer up 1.5 million Coins to begin with, each priced at \$0.50 with this being the case, the maximum amount that this can raise is \$750,000. Should there remain a demand for TurboTradeCoin after this initial amount has depleted, the ICO will provide an additional 2.5 million tokens at a higher price of \$0.75. This will bring in a further \$1,875,000, should all 2.5 million coins be purchased. Throughout the ICO, the TurboTradeCoin token price will increase in \$0.25 increments per round as more tokens become available. There is a maximum of 14.5 million tokens being available via the ICO. The remaining tokens will be used to pay for maintenance and upgrade on our servers and hardware in next phase of the program which is operations expansion. The remaining tokens will also be used to pay team salaries as well as handle other financial and operational obligations. The team developer tokens will be locked in a secure offline wallet for a minimum of 3 years to ensure there is no unfair price manipulation practice which could harm our investors. Any ICO designated tokens not bought at the end of the ICO would be burned, thereby increasing the worth of TurboTradeCoin even before it hits the internal exchange.

The table below shows the Coin price per each unit sale of TurboTradeCoin coin released.

Coin Quantity to be Sold	Pre-ICO Price	Round 1	Round 2	Round 3	Round 4
1,500,000	\$0.50	—	—	—	—
2,500,000	—	\$0.75	—	—	—
3,500,000	—	—	\$1.00	—	—
5,000,000	—	—	—	\$1.25	—
2,000,000	—	—	—	—	\$1.50

The Next Generation Cryptocurrency AI Trading Platform

TurboTradeCoin Affiliate Program

TurboTradeCoin offers investors instant withdrawal of ICO referral bonus in Bitcoin. Our attractive affiliate program lets you earn Bitcoins by promoting and attracting investors to the TurboTradeCoin project. You can even earn without investing or participating in the ICO. We will pay you for each investment or coin purchase made by your referrals.

You can choose to get paid in Bitcoin or TurboTradeCoin during the ICO and you are also able to withdraw referral commission bonus during the ICO.

Investing and Referral Commissions

There are 5 Levels: 10%, 7%, 5%, 3% and 1%

TurboTradeCoin Ecosystem

The TurboTradeCoin ecosystem has been created in order to ensure that all of its sections can operate both as a unit and independently. We aim to change the world of crypto currencies via our ecosystem, because it is true to say that most companies only provide individualized services. With the TurboTradeCoin ecosystem, multiple services will be available for users to take advantage of in a single package, providing significant space for growth. That is why early backers of the currency will be able to take prime position in being a part of the expansion of this decentralized ecosystem. The ecosystem will bring with it several different investment opportunities for its users. These options will be available in an easy and convenient environment. Users of the TurboTradeCoin will be able to participate in such investments as utilizing the unique AI algorithm based mirror trading platform, giving investors access to the TurboTradeCoin platform which uses blockchain technology to process enormous amounts of data at lightening speeds. Depending upon the investment package the user has access to, daily profit will be generated. Mining will also be an investment opportunity via the TurboTradeCoin ecosystem, helping to generate new coins and confirm transactions. Furthermore, through Staking – simply having TurboTradeCoin coins in your wallet – you will be generating interest on top for yourself.

Holders of TurboTradeCoin can also profit from any sort of downward movement that could occur. Simply sell them at a higher price and buy them back when they're lower with the Trading investment option. You simply receive the price difference as your own in the process. Through these various investment opportunities, we aim to increase the usage of TurboTradeCoin on a global scale. Not only that, but via the ecosystem, the goal for TurboTradeCoin is for it to be accepted around the world as a recognized and trusted Cryptocurrency.

TurboTradeCoin Ecosystem

TurboTradeCoin Mirror Trading Platform

What is the Mirror Trading Platform? This is the product of 5 years of hard work and dedication by our software developers, programmers, quants, financiers and research team. Some of whom previously worked for Google, JP Morgan, Advanced Micro Devices (AMD) and LSI Logic.

The investor buys TurboTrade coins during the ICO round. Users shall have access to the Mirror Trading Platform when the last round of the ICO is over. The investor logs into the Mirror Trading platform using the assigned login, password and 2FA created during account generation.

The amount of TurboTrade coins you have allocates your investment package. There are 3 packages currently available in the first release of the trading platform. The more coins you have the better the investment package you have access to. The Package details are as follows;

- 10 – 1,000 coins – Level 1 Package (15 – 20% monthly)
- 1,001 – 10,000 coins – Level 2 Package (21 – 45% monthly)
- 10,001 – 100,000 coins – Level 3 Package (45 – 61% monthly)
- 100,001 – 1,000,000 coins – Level 4 Package (62%+ weekly)

The user can pick what type of trading to utilize; cryptocurrency day trading, cryptocurrency mid-term trading and futures exchange trading. The TurboTradeCoin platform is comprised of a robust and complex trading algorithm created and tested over years by computer programmers and professional traders at the most popular cryptocurrency exchanges. The investors using the Level 3 package have the option to withdraw all proceeds after 1 month, the Level 2 package allows proceeds to be withdrawn after 2 months from the start and the Level 1 package allows for returns 3 months after the trading package was activated.

Note: Although the package an investor is allocated to use is based on their coin balance, users' coins will be free to trade on the internal and external exchanges to allow for free flow and liquidity of TurboTradeCoin.

Trading Package	Amount of Coins	Monthly ROI	Withdrawal After
Level 1	10 – 1,000	15 – 20 %	90 days
Level 2	1,001 – 10,000	21 – 45 %	60 days
Level 3	10,001 – 100,000	45 – 61 %	30 days
Level 4	100,001 – 1,000,000	62%+	Weekly

TurboTradeCoin Mining

TurboTradeCoin coin mining allows users to involve themselves in generating new TurboTradeCoin coins as a reward through confirming transactions on the TurboTrade ledger. Our developers have designed the algorithm of TurboTradeCoin so that it will resist the development of custom mining hardware. Both solo mining as well as pool mining will be possible via the TurboTradeCoin platform. You will find more information on our website, www.turbotradecoin.com. And because of the TurboTradeCoin algorithm, transactions will not fall victim to any dishonest and untrustworthy hardware manufacturers and miners. Users of the TurboTradeCoin coin are able to mine such via any device too. It is not something that specifically has to be done from a home computer. Although this method is possible, users can also opt to mine from a tablet or smartphone too. And where Bitcoin requires an application-specific integrated circuit chip (ASIC) to mine, TurboTradeCoin does not. Instead, it utilizes CPU/GPU to mine. This makes the process a lot quicker and simpler to do

From Block 2-50	100 TTC/block
From Block 51-2000	4000 TTC/block
From Block 2001-4000	3000 TTC/block

POW Block Reward:	8
Consensus Mechanism:	POW, POS
Minimum Stake Age:	1 day
Maximum Stake Age:	14 days

Staking TurboTradeCoin

From the very start of a user acquiring TurboTradeCoin coins, they begin earning interest. Simply put, just by having the coins in their wallet, a TurboTradeCoin holder will begin making profit on them. Through this process, users just need to purchase the coins and keep them within their wallet. This interest is generated in response to users helping to maintain the security of the TurboTradeCoin network. What this means is that with Proof of Stake (PoS) the user of TurboTradeCoin is the banker. And the network for this cryptocurrency is run by the people who invest in it. The revenues that it generates are basically distributed to these stakers in order to reward them for protecting the network. With this in mind, it means that anyone who is a holder of the TurboTradeCoin coin in their wallet will receive interest on top of their balance. Users do have the option to end coin staking at any time and send all of their coins and interest to an exchange platform, for example. It's also not necessary to have your computer eternally switched on in order for staking to occur. As long as the currency remains within your wallet, it will continue generating interest. Additionally, the more TurboTrade coins that a user owns, the higher the amount of profit the level of interest will generate. By this rule, it's better to purchase TurboTradeCoin during the ICO while they're at a lower price, so as to have them generate profit and holders to get the most out of staking. The interest that is generated via this investment option will decrease by 10% in six-month periods, starting out at 60% in the first six months and finishing up at 10% in the final six months. You will need to hold your TurboTrade coins in your wallet for a minimum of 15 days before staking interest begins being earned. Keep in mind that staking ends if someone sends coins away from their wallet during staking or the 15 day period.

TurboTradeCoin Exchange

Another great feature of the TurboTradeCoin coin is that users can also benefit from any downward movements that could occur. Trading the cryptocurrency works to users advantage in this instance.

The TurboTradeCoin cryptocurrency utilizes the script algorithm, meaning that its calculations are much more serialized than those of other currencies, like Bitcoin.

TurboTradeCoin does have a finite number of tokens, limited to 60,000,000 altogether. Just 14,500,000 of these will be available via the Initial Coin Offering (ICO). This limited number of tokens ensures that there will be a constant appreciation of value to compliment the increase in demand for such. Trading TurboTrade coins allows users to buy such at a lower price and sell them at a higher price, thereby pocketing the price difference between these values. This is beneficial as you get to retain all of the profit made between buying and selling. If users want to invest in the Trading option, they will need to own TurboTrade coins to begin with. They simply need to buy these from the exchange via one of the accepted currencies and then sell them when the time is right. This is entirely in the hands of the user, so buying and selling times are entirely their choice. TurboTradeCoin will launch in February 2018 starting out at \$0.50 per coin and as our user base becomes more robust on exchanges the worth will eventually rise to over \$1,250 by the end of the year 2020. Again, as more demand for the cryptocurrency occurs, the interest on coins held by current users will flourish. This is why it's quite a key point for investors to take advantage of the ICO and profit from the price increase from the start on.

TurboTradeCoin Ecosystem Goals and Roadmap

3.02.2018 – Website Launch and Additional Forum Information. The TurboTradeCoin website will launch for people to view and navigate around. The implementation of the whitepaper, the roadmap and services offered by TTC will be displayed. Also creation of the TTC Forum, this is crucial for all those interested to communicate with the Team here at TurboTradeCoin, without this forum, there isn't any chance of an external exchange.

8.02.2018 – Website Registration and Affiliate Marketing Begins. The back office comes into action with potential investors being able to register their details at the TurboTradeCoin website. Affiliate marketing begins to take place and Bitcoin and Ethereum deposits can be made.

9.02.2018 – Pre ICO of TurboTradeCoin starts. A small amount of TTC Coins will launch into the market before the official ICO launch later on in the month.

17.02.2018 – ICO Launch. The Round 1 of the ICO begins with investors being able to purchase coins at \$0.75 each. ICO has a finite number of coins, set at 13,000,000 from the total 55,000,000. The complete back office as well as all of its functions is available. More marketing material is released.

23.02.2018 – Round 2 of the ICO takes place, offering 3,500,000 coins at a rate of \$1.00 per TTC.

2.03.2018 – Round 3 of the ICO takes place, offering 5,000,000 coins at \$1.25 per TTC.

2.03.2018 – External Exchange Requests. February, the first two of the external exchange requests take place. Early requests are put in place so as to ensure that TurboTradeCoin claims a spot. The complete back office is complete and ready with all functions before trading on the AI platform can take place. More marketing material released. Third external exchange request occurs in March.

9.03.2018 – Round 4 of the ICO takes place, offering 2,000,000 coins at \$1.50 per TTC.

18.03.2018 – Internal Exchange Launch. The countdown for the internal exchange ends and it officially launches for investors to exchange TTC for Bitcoin and Ethereum.

22.03.2018 – Third External Exchange request occurs and final plans to launch on pre-approved exchanges are confirmed.

24.03.2018 - Launch of the Mirror Trading Platform. The Mirror Trading Platform at TurboTradeCoin goes live, giving users access to the first AI based Mirror Trading platform on the blockchain network.

30.03.2018 - TTC Mining Pool and Github Source Code. The Mining Pool and the Source Code are released at the same time for users to begin generating new TTC coins. If need be, more mining power will be bought so as to keep a 33% amount to start off with. The Github Source Code is also released, but not earlier than the Mining Pool. If it is, the TTC is gone. Block explorer is ready before the exchange.

26.04.2018 - Full External Exchange Launch. Price of TTC coins should not fall within the first few days. Target price by the end of April 2018 for TurboTradeCoin stands at \$32.00.
