Introduction

F2UPhone is new breed of phone works with cloud computing and block chain technology which will accommodate as mobile app or standalone working system in cloud environment, a concept based on cloud computing and virtualization. Basically F2UPhone uses mainly 3 cloud computing services that are Infrastructure as a service (IaaS), Platform as a service (PaaS) and Software as a service (SaaS).

Why we need F2UPhone?

The history of communication with telephoning system started early stage of 18th century to this world with coverage of limited area in US. Later inventions started by many individual also new companies formed, research of new technologies started at many geographical area of the world for wide area coverage for growing communication systems.

Early and mid of 19th century has given new inventions of telephones made by many companies in this world and communications are started in wider area with country to country networking systems started. By mid of 20th Century new technologies are flowing in bigger way to this world of communication with a wider area on land lines, paging, mobiles are made easy to communicate. Economies started levelling up due to improved system of communications with the newer technologies and communication system.

Mobile phones are forever changing and developing. However it's crazy to think that in just 19th Century standard mobile phones were huge and had a long antenna sticking out of the top. The 20th century and technology has offered us some amazing mobile phones but the question is what is going to be the latest new craze? Later in fag end of 19th Century birth of the colourful mobile phones that were released to market in multiple colours. As time went on, companies improved on the graphics however the main craze was the first even touch screen mobile phone. It wasn't advanced but nevertheless it was touch screen and this also started the introduction of promising future technology. In 2001 was the birth year of the world's first monochromatic display cell phone, with that we wave goodbye to the old and boring black display. You could also change the wallpaper background! This was a huge hit in the market between 2002 and 2003 companies started to introduce mobile phones with camera on the back of the phones.

In the year 2005, some companies started manufacturing of mobile phones with inbuilt for delivering great music and with dedicated buttons for music playback, Memory Stick support, which made it a great gadget for enjoying music anytime on the go. And it still serves all the main purpose of a cell phone. In 2006, mobile phones were transforming with into a stylish gadget. In 2007, some companies launched the world's first advanced touch screen smart phone. It's the first phone to have an operating system, the iOS, and by enabling apps to run on the phone. Ever since our phones have got brighter, bolder, slimmer and more expensive new technology inventions still not stopped.

The above notes are an example of just how quickly mobile phones have been developed and changed in the space of just a few years of technology is being developed every day so what will our phones end up looking like in the future?

Since the release of the first upgraded phones we've had 4, 4s, 5, 5s and now the 5c all in the space of 5 years! technology is now focusing on making flexible phones, phones with very long lasting battery's and phones that are virtually paper thin!

Future technology has brought by F2UPhone with new technology of managing content and storing in cloud computing technology in the phone where you are not going to use of sim card, memory card, and user can use this in any geographical area with internet facility. This technology eliminates all hurdles of loosing of contacts, data, photos, documents even loosing of mobile handset, user need not to worry at all. The information is stored

in safer place with new technology where the user can login with secured credentials to access complete user data and can retrieve for use.

F2UPhone is a New Breed of Virtual Phone which operates in cloud computing environment with the help of SupremeChain technology which very much inherits concept of Blockchain technology for connecting virtual phones in cloud environment for recording ledger of records for data asset transactions arranged in data batches called supremechain that use cryptographic validation to link themselves together. Put simply, each chain references and identifies the previous chain by a hashing function, forming an unbroken chain, hence the name.

F2UPhone members by storing data across its F2UPhone network, the SupremeChain eliminates the risks that come with data being held centrally. The computation power of F2UPhone will improve users experience in creating digital asset and managing digital asset resources among F2UPhone members by way of allowing them to form F2UPhone Business Groups and allowing them to write Smart Business / Contracts without the need of writing codes or without the need of learning complex Computer language.

F2UPhone also utilizes the power of AppCafe2u for converting webpage in to smart Biz apps which can be shared along with other Biz Apps and distributed to F2UPhone members or general public in cloud environment for creating value network.

F2UPhone opens the door to direct interaction between parties and thereby eliminates the need of aggregators and thereby it creates a truly decentralized sharing economy.

F2UPhone User Groups is easiest way of allowing people to form Business Groups and Decentralized autonomous associations and F2UPhone Users can write smart business contracts without the need of any prior understanding of computer language using the chat interface available in F2UPhone user groups.

The most prominent and important feature of F2UPhone is power of creating digital assets or tokens using Digiassetz web app using Chat Interface or IVR interface with Digiassetz will help you in creating digital assets in least cost and least time without the need of learning any computer programming language. One can start offering their Digital assets and token using auto trade feature (will be introduced shortly) or else you can list it for exchange with other digital assets listed in F2UPhone asset exchange platform. (will be introduced shortly).

For Cloud authentication of Digital Transactions F2UPhone uses Voice and Data Streams connected to F2UPhone user members and every member participating will get incentives in the form of \$FRP Asset tokens which is freely exchanged for F2U Coin or can be inter exchanged with any other digital assets.

Cloud Computing and Virtualization

Blockchain Technology gained importance for its ability for creating distributed ledger system and with the advent of cloud computing it gained further importance and F2UPhone utilises shared cloud computing power along with cloud storage and cloud app functionalities to create distributed ledger system for user's data transactions.

The usage of F2UPhone and its tools also provides opportunity for creating advanced business solutions based on trend and opinion collected using user data from F2uPhone. F2UPhone also provides platform for F2UPhone users to deploy advanced business solutions and share it to public or other F2UPhone users.

Virtualization is basically making a virtual image or “version” of something such as server, operating system, storage devices or network resources so that they can be used on multiple machines at the same time. The main aim of virtualization is to manage the workload by transforming traditional computing to make it more scalable, efficient and economical.

F2UPhone Mainly differs with existing phone in two aspects

1. User Can share his app resource and app functionalities to his client in cloud environment.
2. User Can Keep track of visitor or client activities in relation to app usage shared with client or visitor
3. User of F2U Phone can program his contacts through F2U Token offers for Promoting his business.

Fig: Cloud Computing With Virtualization

F2UPhone is having features as basic phone as below:

- Many mobile apps are easily installable in F2UPhone as web apps
- SIM card not necessary
- It also work from any computer system
- Voice clarity is same as any other mobile phone
- Video conferencing facility embedded to facilitate user community
- Can communicate to any member across the world
- Complete personal data is stored at cloud computing and encrypted
- End to end data encrypted between user to user and user to system
- Data synchronize between multiple servers at multiple geographical locations

F2UPhone also facilitates creating distributed ledger for asset transaction of F2UPhone user community in cloud environment using supremechain technology which inherits the concept from blockchain technology. The main features are

- F2UPhone facilitates asset instance creation using supremechain technology
- F2UPhone facilitates transfer of digital assets among F2UPhone users and outsiders using supremechain technology
- F2UPay Service facilitate transfer of Payment using Major Crypto Currency and Token assets

- F2UGeo Services facilitate Location Based Services for F2UPhone Users
- F2U Chat bot services also provides platform for writing @F program for writing smart biz contracts.
- F2UPhone enables Appcafe2u services to everyone to create smart web apps without much programming knowledge.

Ultimate cutting edge technology with good QoS

Communication and Mobile revolution has just a Beginning

One would have impressed with the mobile trends in previous years, any type of apps, social media apps, huge contacts etc.. there was a lot going on. What if the mobile revolution is just beginning? What if the next mobile revolution is all about real world and cloud computing context driven experiences individual needs that are taken care of through mobile, making our lives easier and more seamless, Smart move, more informative more towards support in business, lifestyle and day to day activities also easy to operate, even no worry on loosing mobile hand set; it will be a new revolution beginning by F2UPhone to all.

The Use of new technology for F2UPhone users

F2UPhone supports use of @F language for developing easy, smart, intelligent contracts and chat bots for developing automated secured transactions.

As a pilot project this has been tested in India with many people and other countries. Successfully app is working and enjoyed by many uses in India and other part of the world too and given good response and suggested to many individuals to use the facility.

World's First CRYPTO and Cloud computing phone

One would have seen data storage and use of cloud computing or advanced computing for purpose of Enterprise Resource Planning and use, E-Mailing system and other services. Now this is a new technology we incorporated to use this technology for F2UPhone. This is the first of its kind for usage of mobile phone. Cloud computing for mobile phone is the new platform developed by F2UPhone. Globally this is usable.

Simple and easy use of F2UPhone

F2UPhone is very simple and easy to use and mainly works from browser of mobile phone and we are now working out exclusive hardware functionalities to provide F2UPhone at least cost in developed and under developing countries. It works as same as any mobile phone in this world.

Demo link of basic functionalities of F2UPhone is given below:

Click here <https://www.f2uphone.com/>

Cloud computing

Cloud computing technology is based on three factors

- a. Grid computing, b. Utility computing c. Automatic computing.

All the data is stored on the servers and can be accessed simply by authenticating with the help of the internet anywhere in the world.

Virtualization

Virtualization is basically making a virtual image or “version” of something such as server, operating system, storage devices or network resources so that they can be used on multiple machines at the same time. The main aim of virtualization is to manage the workload by transforming traditional computing to make it more scalable, efficient and economical. Virtualization can be applied to a wide range such as operating system virtualization, hardware-level virtualization and server virtualization. Virtualization technology is hardware reducing, cost saving and energy saving technology that is rapidly transforming the fundamental way of computing.

Virtualization of F2UPhone

F2UPhone is enabled with a facility of virtualization of your complete phone having many features like, your contacts, photos, videos, images, messages, retrieve voice messages in your absence to attend calls, documents, etc.. it also works from any phones or computer system having internet facility where you can login and use of the phone.

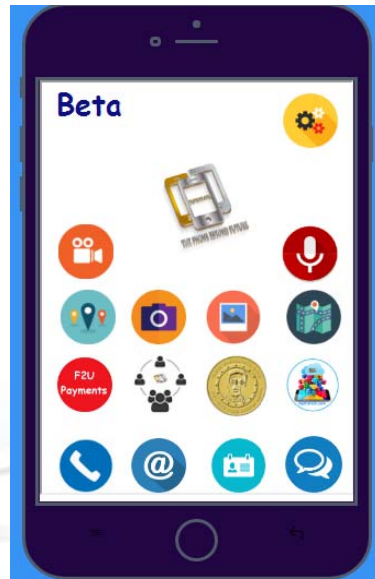

Initial Features

F2UPhone will become a reflection of each user’s outer, real world life, instead of traditional mobile being a projection of the user’s inner world. More traditional mobile experiences are calling, games, chat and using specific apps for specific functions, like Google Maps for navigation, we have developed our own app solution called F2UNearby Services and we are confident that it will cater the need of 70% of local service providers such as local shops, hospitals, street vendors, laundry services, Pharmacy, basic needs of day to day activities. This will reduce the cost of services which would have been paid to aggregators.

New mobile experiences will be driven by your daily needs, and they will all be in synch with one another, globally connected with cloud computing technology.

F2UPhone®

Global markets

Growth of global population increases global business opportunities and communication systems also going to be more effective and prominent use of phone, F2UPhone will support global peoples in adding new features and services.

Global mobile traffic

Global mobile traffic usage and growth requires alternate or new systems of communication

Global mobile traffic (in EB per month)

Global markets& marketing Structure:

We will be issuing initial phones under the brand name of F2UPhone and service rendered by providing white label solution to all social media companies and campaigns marketed in guaranteeing service through F2UPhone. All the revenue for services are collected through F2U Coins globally

ICO Structure & Offers

Gyantraz is an alliance of M/s Zipzzo Trading Corp Ltd. The Gyantraz is supporting in developing of F2UPhone with new technology to globe. F2UPhone is raising funds by way of issuing F2U Tokens through the smart contract system operated by Ethereum smart contract. The funds raised by issue of F2U tokens will be retained by Zipzzo Trading Corp Ltd.

Zipzzo Trading Corp Ltd is a registered body with legal responsibilities and is subject to audits. This will ensure the transparency of the operations and secure transactions of F2U Coins.

F2UPhone®

The whole revenue operation is routed through F2U Coins and coins are limited for issue and the value of coins may go up based on demand and supply for the coins.

Coin Name: F2U

Total Coin issues: 90 Million

Pre-ICO: 30 Million

ICO: 30 Million

Users, Founders, Marketing, Bounties: 30 Million

Ether-Smart-Contract-Address:

<https://etherscan.io/address/0x93182d5f3a05bf5eb6b9f6c0e003a46dff9128ff#readContract>

F2U Token is tradable token and we have already issued F2UPhone service tokens for availing F2UPhone service, F2U Tradable token listed under smart contract ERC20 at Address: one can exchange with service tokens <https://etherscan.io/token/0x93182d5f3a05bf5eb6b9f6c0e003a46dff9128ff#balances>

F2U Coin supply:

We will limit the supply of F2U Coin and any additional release of F2U Coin is considered using democratic process after securing more than 51% of coin holders consent.

Renewal of Subscription will be made through \$FRP Coin or \$ US and if 51% coin holders agree for Fresh Issue then fresh subscribers will be issued first rights on coins based on their present holding ratio at rate decided by members.

Initial value:

Initially value per F2U Coin is locked on US \$ 30 per 1 (One) F2U Token and later price depends on market demand and supply factor for F2U Coins.

¹May be adjusted in accordance with clause 18 Round a conversion as outlined in the Terms and Conditions
The F2U Coin have not been and will not be registered under the United States Securities Act of 1933, as amended (the "Securities Act"), and may not be offered or sold in the United States or to or for the benefit of US persons (as defined in Regulations under the Securities Act) unless they are so registered, or an exemption from the registration requirements of the Securities Act is available. One such exemption allows the resale of F2U Coin purchased for their own account and for F2UPhone purposes only by users who (i) are not otherwise affiliated with the F2UPhone or otherwise to Zipzzo Trading Corp Ltd or Gyantraz (ii) have been exposed for some time to the economic risks that ownership of F2U Coin entails, and (iii) are not part of the distribution of the F2U Coins.

F2U Token Pre-ICO offering

The Basic F2UPhone functionality is available at present and most of the features are in development and testing stage. F2UPhone will commence its F2U Token Pre-ICO or PreF2U Asset issues from August 1st 2017 the official F2U Asset or token issue will commence.

The initial F2U Asset offer is no way considered as sale of securities. Pre Initial Coin offers guarantees appreciation in value expected to be not less than 110% to 2,000% for each asset token purchased in bulk (Minimum 3 Lakh Tokens). We are restricting total coins circulation to 90 Million and we are offering 30 Million Pre ICO token offer from 1\$FRP to 9\$FRP as per the below table, the use of F2UPhone by members (Most of the Features offered now Free to experience the value offered to public till end of December 2017) 30 Million Tokens are offered ICO price ranging from US \$ 30 approximately and rest of the 30 Million token is reserved to founders and marketing and bounty programs. Options also open to procure F2U tokens to public by following Cryptocurrencies

Exchange F2U Tokens from \$FRP, ETH&BTC

1 F2U	USD	30.000
30 \$ FRP	F2U	1.000
1 BTC	F2U	120
1 ETH	F2U	9

FRP\$ – ERC20 Token / Coin

Contract Address: <https://etherscan.io/token/0x1fa1a89f72c1011122e62261bb962b123ac40a76#balances>

FRP\$ is an ERC20 token issued free to public through freerewards2u programme earlier, we now give opportunity to public to exchange FRP\$ with F2U Tokens. Presently we value 1 FRP\$ @ 1 \$ US for the purpose of F2UPhone token allocation, It is open to all public in vigash.com exchange \$FRP tokens in various denominations. Public having \$FRP can exchange the same with F2U Tokens and we expect F2U tokens appreciate in higher levels in near future.

There are 9 Billion \$FRP Tokens and an approximate 1,000 \$FRP is earmarked for \$FRP Incentive program for each F2UPhone User.

Bulk offers Discounts

Pre ICO issue @ 1 F2U Token = US\$ 30

Discount Pattern:

info@f2uphone.com

F2UPHONE

+918197908679

F2UPHONE

Pre ICO Offer for total 30 Million Tokens at discounted rates

1. First 1 Million Tokens at @ US\$ 1 or 1 FRP\$
2. 2 Million Tokens @ US\$ 3 or 3FRP\$
3. 3 Million Tokens @ US\$ 5 or 5FRP\$
4. 4 Million Tokens @ US\$ 7 or 7FRP\$
5. 20 Million Tokens @ US\$ 9 or 9FRP\$

ICO Issue will be as minimum of 1F2U Token = US\$ 30 or 30FRP\$

If any balance tokens available in Pre ICO issues will be carrying forward to ICO Issues.

ICO structure & Offers

F2U Coin Distribution

ICO offer Bonus to users

30 Million Token distributed in discount patron

- Early bid @ US\$ 15 or 15 \$FRP considered 10 Million Tokens
- Next bid @ US\$ 20 or 20 \$FRP considered 10 Million Tokens
- Final bid @ US\$ 25 or 25 \$FRP considered 10 Million Tokens

Balance Token Distribution:

30 Million Tokens are distributed in following scheme

Distributed to users	→	66.67%
Founders	→	20.00%
Bounties	→	10.00%
Legal & Admin	→	3.33%
Total Distribution	→	100.00%

Bounties:

- Campaigns associated to media - 6%
- Exclusive supports - 4%

The F2U Coin have not been and will not be registered under the United States Securities Act of 1933, as amended (the "Securities Act"), and may not be offered or sold in the United States or to or for the benefit of US persons (as defined in Regulations under the Securities Act) unless they are so registered, or an exemption from the registration requirements of the Securities Act is available. One such exemption allows the resale of F2U Coin purchased for their own account and for F2UPhone purposes only by users who (i) are not otherwise affiliated with the F2UPhone or otherwise to Zipzzo Trading Corp Ltd or Gyantraz (ii) have been exposed for some time to the economic risks that ownership of F2U Coin entails, and (iii) are not part of the distribution of the F2U Coins.

F2UPhone Roadmap and Development

We have developed Plug-in Model of basic features of F2UPhone to market as White Label Solution to Internet Marketing Enterprises. Now we are working on advanced F2UPhone prototype model and Roadmap of development is given below.

Project is as huge as F2UPhone would not succeed without a thorough strategic planning and expansive vision and programme. Therefore, we have put much emphasis on writing every milestone. Having a roadmap is very important for F2U Phone, as it keeps us focused on the present moment, and allows us to zoom into the future, once the targeted milestones are reached.

The concept of new technology of F2UPhone started early January 2017, concept started turning to reality on day by day. Plans started to reach next levels of heights;

- **Design Time** **By End of Sept 2017**
- **Prototype Development** **By End of Nov 2017**
- **Testing new models & Market Feedback** **By January 2018**
- **Initial Subscription for Registration Based On Pay Model** **By January 2018**
- **We are working with hardware vendors to release F2UPhone Hardware version and it is no longer part of Present ICO Release Discussion.**

Total time consume maximum 6 months from the date of ICO Bid Closure. Expected to launch full-fledged operation in market by January – 2018.

August 15, 2017 – F2U Token Pre-ICO start

August 31, 2017 – F2U Token Swap ICO

The start of the Token Swap ICO campaign for initial token distribution and offering

September 1, 2017 - Token Swap ICO

September 30, 2017 – End of ICO

Additional benefits to users in F2UPhone

1. F2UPhone is a revolutionary communication stand alone web system, operates in all platforms
2. F2UPhone supports advanced Block chain technology called Supreme Chain where cloud computing enabled for users of F2UPhone and authenticated hashed transactions are recorded in public ledger at **supremechain.com** and any user of F2UPhone is rewarded with FRP for online and offline mining transactions.
3. F2UPhone supports processing of transfer of assets through F2U Cards for major crypto currency coins using secured environment. F2UPhone establishes algorithm based on user transactions and also in process of integrating face and voice reorganization for authenticating assets or currencies transfer transactions.
4. F2UPhone supports use of @F language for developing easy, smart, intelligent contracts and chat bots for developing automated secured transactions.
5. F2UPhone supports AppCafe2U a unique web based app for transacting online like BlockChain technology. One can share app interface for developing robust business applications.
6. One can use cloud storage facility provided by F2UPhone user for their valuable data and same can be shared to users of F2UPhone for FRP rewards.
7. F2U rewards you with FRP for downloading apps sponsored by AppCafe2U like paid apps, paid channels, paid music, paid movies.
8. F2UPhone helps you to create digital assets with lowest cost using DAZ\$ from Digiassetz.com
9. One can easily create web app with in a minutes and host it through F2UPhone using AppCafe2U platform.

10. F2UPhone helps people to locate their day to day needs and support best service and best products of their needs in an easy way by showing detail information in F2UGeolocation services.

F2UPhone revenue scheme & features

The connection price is formed based on the technology used by F2UPhone. However presently this service is free to users for first year till end of December 2018

Membership Plan	Free Member	Silver Member	Gold Member	Platinum Member
Token Purchase	0	1 F2U	3 F2U	6 F2U
