POPEIE

INTRODUCTION

POPEIE is a new cryptocurrency asset based on the Waves Blockchain and Ethereum Blockchain. POPEIE is used for social media exchange services within the Web Platform (close to alpha release) and Mobile APP.

POPEIE helps:

- Non-profit associations collect funds needed to organize events
- Token Investors trade tokens as soon as the currency is available on major exchanges.
- Small and medium sized businesses and digital marketing companies achieve branding return through geo-localization

The mission and vision of POPEIE is to be the main tool to mediate negotiations and to help fundraising for social events

Who we are?

A team composed of IT marketers and developers with decades of experience, as well as university students as project supporters.

What do we want?

To attract sufficient investment capital to launch our project. Please see the 4 steps on our home page.

What is the challenge and how do we solve it?

Globally, there currently exists thousands of non-profit organizations (excluding governmental and religious) that encounter difficulties in fundraising. POPEIE offers the fastest and easiest way to fundraise, by providing a user friendly platform based on blockchain technology.

For investors, POPEIE provides the possibility to visibly track operations of geo-synched branding during events

Why invest in POPEIE's token?

It allows investors to have privileges when the platform is launched. Tokens purchased at this stage will have advantages ahead of pre-sales.

There will be a discounted price for those who believe in the project, which after almost 2 years of hard work is finally being implemented.

On the platform, tokens can be used in two ways:

- 1) To start financing the first events organized by registered associations. Each event will have its own goal and, in case of non-achievement, the tokens will be returned.
- 2) To transfer and sell tokens through the platform or the exchange

APP SMART TV

POPEIE APP for Smart TV will become a real interactive channel that unifies television devices with personal computer functionalities.

It represents a new communication system that conveys contents to a wide audience.

It will be compatible with Smart TV Samsung and all other Smart TVs included in the Smart TV alliance (Smart TV LG, Smart TV Philips, Smart TV Toshiba and Smart TV Vestel)

SAMSUNG

APP ANDROID/IOS

POPEIE APP can be installed and utilized on your own mobile device with the goal of offering services to the non-profit associations.

Direct interaction with the API on the WEB POPEIE platform is made available by the operating system provider to guarantee immediate access to all device functions, improving usability for all those who want to develop their own app.

A lot of attention will be given to the push notification system, gps, camera, accelerometer etc.

POPEIE app will be compatible with Andriod and iOS operating systems
