EXMR

EXMR

TOKENIZED MONERO ERC-20 ON ETHEREUM

Content

2. LEGAL DISCLAIMER

The purpose of this document is to introduce EXMR MONERO℠, is an ERC-20 division of Monero, with technology and superior to the MONERO business model. EXMR offers potential owners acquire their tokens in relation to what it means to obtain an ERC-20. The information contained below may not be exhaustive and does not involve any element of a contractual relationship. Its sole purpose is to provide relevant and reasonable information to holders of potential tokens so that they can perform an exhaustive analysis of the company with the intention of acquiring their EXMR Tokens.

EXMR MONERO℠ will be at PRE-ICO in February and to the ICO in March, with their tokens based on Ethereum (ERC-20). This document does not constitute an offer to sell or a solicitation of an offer to buy or a guarantee in any jurisdiction in which it is unlawful to make such offer or solicitation. The FINMA Switzerland nor the values of the United States and SEC. Or any other foreign regulatory authority has approved an investment in the tokens.

An EXMR token can be categorized as a guarantee of privacy as a right to holders of tokens, to receive the benefits of its operations from development and unique features. Statements, estimates and financial information contained in this document constitute statements or information. Such statements or information relate to known and unknown risks and uncertainties that could cause results or actual events to differ materially from estimates or results expressed in such implied or forward-looking statements. This document is the official document in English language, that is the official source of information about EXMR token. The information contained herein can be used in the course of written or verbal communication with existing and potential community members, partners and so on. In the course of the information, content may change during the development of EXMR. The precision of the English White Paper, the provisions of the original English language document shall prevail.

3. OVERVIEW

EXMR is a token of ERC-20, we call it the new Monero. EXMR is based on the interface of the blockchain from Ethereum, intended to serve the same purpose of the previous Monero, but a fast and secure way. Users can now have a new experience with EXMR as Monero, but the best replacement for the original, when more people trying to discover our EXMR has a cheaper transaction in transaction cost and with more privacy in the ecosystem of Ethereum, this becomes a fascinating experience, making the user prefer to use instead of Monero EXMR. Our growing community is changing to Ethereum technology, because this is one of the best platforms that maintain a constant technological advancement, offering every day more privacy, speed, and safety in their transactions, the advantage of getting a Crypto EXMR currency by having your complete control of your transactions, this makes immediately EXMR digital insufficiently active. This intelligent Ethereum, accompanied by EXMR MONERO contract, which aims to encourage online purchases through the main crypto coins, sees a great future for EXMR making it one of the most extraordinary cryptos by its utility. EXMR Get Crypto Payments project will offer the possibility that people can buy goods and services in online stores, as well as physically. The entire community involved in the world of the crypto coins were in need of a digital asset as since EXMR which can now purchase items online if cost, pay for goods and services, etc. EXMR MONERO℠ is important to note that it is not controlled by a central organization. There is not a single agent with power modify rules of the shareholders or the economy of the currency, but something that operates under a consensus in every movement. This document presents the philosophical basis, the technical bases and economic mechanisms of EXMR.

3.1 INTRODUCTION

EXMR is a token ERC-20, working under the Ethereum ecosystem, we all know that it is the fastest in the world, in terms of time and privacy and fast generation of blocks, through the implementation of zk: SNARKs + STARKs, we can then have an EXMR working faster and safer in terms of speed and privacy, an alternative so people can change towards a real promising technology, with a value that going in a constant increase over time, for the support and the avant-garde represented by the Ethereum ecosystem in addition to their payment gateway "GetCryptoPayments.net by EXMR MONERO℠ " project.

3.2 MISSION

Our mission is to create a revolution in the market around EXMR to become one of the cryptos most valued currency, we aim to be within the 100 main crypto coins, according to market capitalization. Our payment gateway system will make EXMR can obtain a broad marketing, if we add the fact that EXMR has a limited edition of 15 million units, and that it has support from a large community that provides a constant support to each now, in addition to its online payment gateway project, where stores online merchants may receive payments in their sites web as well as physically, in other major currencies crypto, both EXMR this economic environment will make EXMR MONERO Family more strong every day.

3.3 VISION

We are helping to expand the boundaries of investment possibilities and to encourage sceptics to recognize tools offering the technology blockchain since this is a new reality for the classic financial markets. In short, EXMR MONERO℠ aims to be a point of reference for the investment capital and a new instrument to be included in current, online payment system with the goal of being an emerging opportunity for a distributed economy. We are confident that the ecosystem that is being created around EXMR MONERO℠ is promising since the objective is that each person to navigate through a virtual store can see the option to acquire their good or service through EXMR, this is our long-term goal.

3.4 THE PROBLEM

In the market for the crypto coins, the main problems are security, cost and the lack of privacy in every transaction. Many people have access to the crypto coins, but only to sell them and buy them in the Exchange, being this one of the reasons of the because many crypto coins cannot advance because of this reality, many cryptos to coins have subtracted your credibility in large part of the world. EXMR MONERO℠ aims to change this reality with our proposal.

3.5 THE SOLUTION

Any business or individual wants speed, convenience, transparency, privacy, low operating costs, security and control over your transactions, EXMR is implementing with collaborative technology Ethereum, zk: SNARKs + STARKs all these advantages and solutions. Our alternative is to encourage also with your online payment gateway a better confidence towards the tokens and all the crypto coins at the same time. Another solution is that now a number of stores and online merchants may receive payments in EXMR with zero costs of tariff and other crypto coins this one does with rates...

4. TECHNICAL INFORMATION

• Why we select Ethereum Blockchain

The blockchain of the Ethereum has a high technological level, it works very similar to Bitcoin, but above all the most important thing the blockchain consists of a series of blocks and each block contains a pointer to the previous block and an ordered list of operations. Blocks are secured by the proof of work, with "long chain" (as defined by the total difficulty) by defining the set of committed transactions and order that must be processed. To get to the "current state" of the Ethereum blockchain, a node can start from the State of "genesis" (a common initial state that is included with each client from Ethereum) and process each transaction, any balance/sequence resulting from the application number code storage changes sequentially processing and code of execution of the transaction. The same process occurs in Bitcoin; Although Ethereum' s emphasis on "transition state" of the execution of the transaction model is unique (for example, in Bitcoin, a transaction often philosophical is seen as an expense "outputs" from a previous operation in history, not in objects in the State), the way it works the code Ethereum, Bitcoin and other protocols such as ripple, Dogecoin, etc., is essentially the same.

• What is zk: STARKs + STARKS

EXMR is backed by Ethereum metropolis that adds a new cryptographic privacy tool (zk: SNARKs + STARKs) since it was implemented by Zcash due to its success. The addition of the zk: SNARKs technology + STARKs in Ethereum is another added value, they are important for business, the economy, since the zk: SNARKs + STARKs is a first level technology that provides privacy and auditability in every transaction.

We are delighted to see the extension of this powerful technology, we are proud that EXMR MONERO℠ was compiled under the Ethereum platform and with this project, we look forward to receiving all the support from the cryptographic community and all the Ethereum accumulators and other crypto coins.

• Created to be Anonymous

Now with the update from Ethereum metropolis and with the function of privacy, the user via a new Protocol of anonymity known as: zero-knowledge proofs, given that one of the main reasons why MONERO, Zcash and other more its acceptance has grown and is able to offer users privacy of their transactions, believe EXMR MONERO℠ is by far one of best among the crypto coins, since at the time of purchase and sell anonymously you can protect yourself with anonymity. Bitcoin is not anonymous, there has been a lot of articles for buyers and sellers to be arrested, and this is just the tip of the iceberg.

4.1 EXMR TOKEN

EXMR is only created during a single event and this was started last October of 2017. EXMR believe up to 15 million this means that the maximum number of its total supply of EXMR will be 15 million. EXMR was distributed only 25% of its total, in rewards in your first 3 months of your departure to supporters at a rate of 0: 0.00 USD with the promise of being holders and members of loyalty of EXMR MONERO℠ project, then gradually place it in the exchange up to 0.005 ETH or the equivalent of us $1.00. At the end of our ICO hope have distributed more than 10 million of EXMR is our goal. The remaining 5 million will be used for the ecosystem of our payment gateway online.

Name: EXMR
Symbol: EXMR
Decimal: 8
Contract: 0xc98e0639c6d2ec037a615341c369666b110e80e5
Total: 15 million

5. XMR vs EXMR

Great advantages that can be found within our new EXMR MONERO℠ is a time of block 15 seconds, which makes it superior to the traditional Monero, where his block time is up to 2 minutes, a difference of more than one minute and a half minutes i.e. a faster EXMR. In terms of the total supply of EXMR will exist only 15 million, while the previous version of Monero has an infinite supply. In the comparative table below, you can now appreciate the great advantages of our advanced EXMR MONERO ℠ represents.
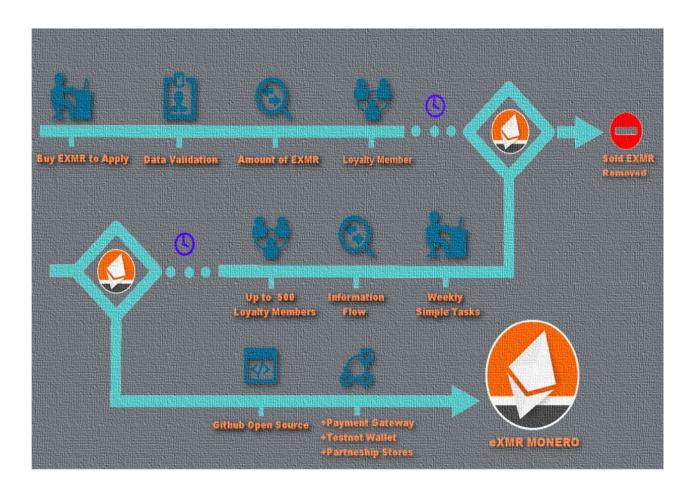

Comparison chart:

POW	POW + POS
2 MINUTES	15 SECONDS
PRIVACY	PRIVACY
INFINITY	15 MILLION
FINALITY 21 MIN	FINALITY 3 MIN
RING CT	ZKSNARKS
SLOW	FAST
NOT PAYMENTS YET	PAYMENTS AVAILABLE
LIGHTNING NETWORK	LIGHTNING NETWORK
NO S+P YET	SHARDING + PLASMA
NOT OWN P. GATEWAY YET	OWN PAYMENT GATEWAY
OWN WALLET	OWN WALLET
10 CONFIRMATIONS	12 CONFIRMATIONS
NO SMART CONTRACT YET	SMART CONTRACT

6. LOYALTY PROGRAM

We present the best loyalty program, organized and controlled, that make our EXMR each day one of the most famous and coveted projects, among all the crypto coins on the market, we dare to say that soon will take an enviable position before many others altcoins, our strategy of reward dosed into an exclusive group of people creates an expansion of our community, where each participant performed work for EXMR MONERO℠, this would achieve the goals to set for the interests of the project.

Graphic of Loyalty Members in action.

7. VALUE FOR HOLDERS

The value of EXMR is linked to three determining factors.

First - EXMR with a limited supply of 15 million, estimated to reach in a short time a trillion-dollar market capitalization, by the great demand and utility of EXMR MONERO℠, creating this increase in the value of EXMR, from, by the use of its payment gateway online, direct sales and multi-wallets point.

Second -EXMR controlled distribution helps to achieve and increased its market value day by day, many people can acquire during the PRE-ICO and ICO and later through Exchanges and market. A

Third - EXMR will have a dividend, distributed on a quarterly basis, this bonus will be intended only for accumulators and holders of EXMR, which will come from revenues by concepts of the rates obtained by each online sale, received by the users of the gateway getcryptopayments.net, with this incentive to the obtainment of EXMR MONERO℠ as a valuable asset for each holder. Understand that the value of EXMR will grow gradually in time, which makes it into a precious asset and with a promising future.

7.1 ACHIEVEMENTS

We have built a community that is very strong in a short time, managing to create a popularity, within their first months obtained most of 2.9k followers on Twitter, 1.7k on Facebook, more than 1.5K members are connected to English telegram and 1.2k members are connected to Spanish Telegram project and more than 73 followers in Medium, you can find us on Reddit and Bitcointalk with over 100 reviews more positive feedback, for both profiles. Another important achievement has been the acceptance of EXMR as the official token within the platform Ethereum and Myetherwallet firing others who tried to imitate us.

ROADMAP

OCT. '17
1. Birth of EXMR : Smart Contract Deployment.
2. Team Integration.
3. EXMR on Social Media: Twitter, Facebook, Reddit, Telegram etc..
4. EXMR Verified by Etherscan.
5. EXMR Symbol added in MEW.

NOV. DEC. '17
1. Bitcointalk forum.
2. Communitive growth on Social Platforms.
3. White Paper.
4. Built Loyalty Support Program to achieve rapid growth.
5. Stop Bounty

JAN. MARCH '18
1. Global awareness and adoption campaing.
2. Upgraded Website.
3. EXMR Developement by going for an ICO.
4. 5 Million EXMR will be distributed from Feb. to March.
5. Distribution of EXMR.

APRIL MAY '18
1. We will list in Coinmarketcap.
2. Listing EXMR on Major Exchanges.
3. Payment Gateway + Merchants Tools + Wallets Generation.
4. Partnership and collaboration with Shapeshift + Changelly.
5. Voting system to add Coins to the payment gateway.

JULY SEPT. '18
1. EXMR placement for customers on the Payment Gateway
2. increase of coins in our payment gateway from 40 to 80.
3. We will list in Coinmarketcap.
4. With all this EXMR will be Self-sustainable with Natural Growth.
5. Under top 100 Cryptocurrencies.

10. CONCLUSION 1

EXMR only has 15 million supply and supported under the Ethereum platform provides an improved Monero, in the world of encryption, with the ' zk SNARKs + STARKs is the new technology that we are integrating the ERC-20 and our new EXMR MONERO℠ is now faster and has the "protection of privacy".

Our main proposal is to cover several fundamental aspects such as: security, privacy, lower-cost transaction, speed, and our prototype of business model includes the payment gateway online, a point of sales, multi-wallets and a global expansion of our project. A macro uses and unlimited market of EXMR worldwide spreading and reaching cryptographic financial model in different languages in different countries, so everyone can use our services online. EXMR accumulators will have benefit from quarterly dividends, by keeping a number above 5,000 EXMR, all this, are some of the many advantages of the use of our secure EXMR MONERO℠ that makes us better than the previous Monero platform. Everything is changing, always old technology has been replaced with the new one and each one brings a new opportunity to crypto space. Investors in the world of the cryptocurrency can take this opportunity to get in each EXMR MONERO℠ at low-cost and expect to grow it long for sweet fruit.
